An array of options for your patients

YourBlueprint® offers the following no-cost options to eligible patients who need assistance accessing their therapy:

Dose Exchange

This program allows patients taking AYVAKIT® (avapritinib) to trade in their remaining medication for a new dosage in the event of a prescribed dose adjustment

QuickStart

Provides a short-term supply of therapy in the event of a coverage-related delay

Coverage Interruption

Provides a short-term supply of therapy to patients who are experiencing a lapse in coverage

Getting started

It can be difficult to predict if your patients will encounter coverage delays or situations that require financial assistance. By initiating the YourBlueprint enrollment process as early as possible, you can help your patients receive the support they need, when they need it. Help your patients avoid therapy delays by completing an enrollment form or calling YourBlueprint to speak with a Case Manager.

Two simple ways to get started

CALL 1-888-BLUPRNT (1-888-258-7768)
